Ayush Singh

+91-7031678999 | ayusingh693@gmail.com | GitHub | LinkedIn | Leetcode

PROFILE

B.Tech (IT) student skilled in Python, C++, and ML frameworks (Scikit-learn, TensorFlow, PyTorch). Experienced in LLMs, Generative AI, and Agentic AI for building scalable and intelligent solutions .

EDUCATION

Madan Mohan Malaviya University of Technology **Gorakhpur, Uttar Pradesh**

Bachelor of Engineering in Information Technology 2023 – 2027

SKILLS

Programming: Python, C++, JavaScript, React **.**

ML/AI: Machine Learning, Deep Learning, NLP, LLMs, LangChain, LangGraph, Fine-tuning, Scikit-learn, TensorFlow, Fast API

Data & Analysis: Pandas, NumPy, Statistics, Matplotlib, Plotly.

Tools: Jupyter, VS Code, PyCharm, IntelliJ, Kaggle, Git/GitHub.

EXPERIENCE

HapScale Pvt Ltd *Bangalore, India*

Software Developer **Dec 2024 – July 2025**

- Spearheaded the development of secure API integrations for seamless data handling, boosting performance 25% .
- Automated the password reset process, improving user account security and reducing manual interventions 99.9%.
- Streamlined the HapScale Landing Page, leading to a 30% increase in user engagement and brand visibility .
- Created 5+ dynamic dashboards using Streamlit and Matplotlib, enabling HR teams to track real-time sentiment shifts and top-performing departments
- Performed in-depth exploratory data analysis (EDA), reducing reporting time by 35% through automated scripts and visual summaries

PROJECTS

100 Days - 100 AI Agents **Sept 2025 – Present**

- Built 8+ AI agents in a structured 100-day challenge, integrating LLMs, multi-agent orchestration, vector databases, and real-world APIs to automate customer support, lead generation, & communication workflows.
- Integrated 6+ external APIs including Instagram API, Google Maps, DuckDuckGo, Apify, enabling real-time data retrieval and automation workflows.
- Implemented multi-agent customer support system with query routing and sentiment analysis, reducing manual support effort by ~60% (simulated evaluation).

CodeForge-AI **June 2025**

- Built an AI coding agent using the ReAct framework that automates 80% of repetitive developer tasks, reducing coding time from *30 minutes to 30 seconds*.
- Engineered a modular architecture with 15+ core components (agent.py, state.py, tools.py, cli.py) enabling scalable reasoning workflows.
- Reduced manual debugging effort by 60% using step-by-step reasoning, workspace state tracking, and intelligent iteration loops.

ACHIEVEMENTS

- Rise To Top Winner – District Level Competition (link)
- Hackathon Finalist – Techfest, IIT Bombay (Top 0.5% out of 10,000+ applicants in VISIONX AI competition)
- SIH Internal Winner – Secured 2st place among 160+ teams in Smart India Hackathon internal round at MMMUT
